

# Termiglass

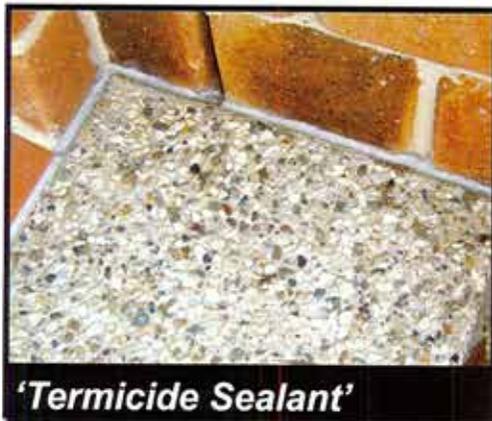

"The Natural Solution"

**Termiglass**

Termiglass - Approved by CSIRO, Technical Assessment No.313

'Termiglass' is the leading termite barrier in Australia on environmental attributes. With a durability of over 60 years Termiglass is the non toxic eco friendly Termite barrier that has been rated number one by Good Environmental Choice Australia. Too hard to chew, too small to crawl through and too heavy for termites to move makes Termiglass the natural choice for termite protection.

**'Termicide Sealant'**

Termicide Sealant - Approved by CSIRO, Technical Assessment No.299

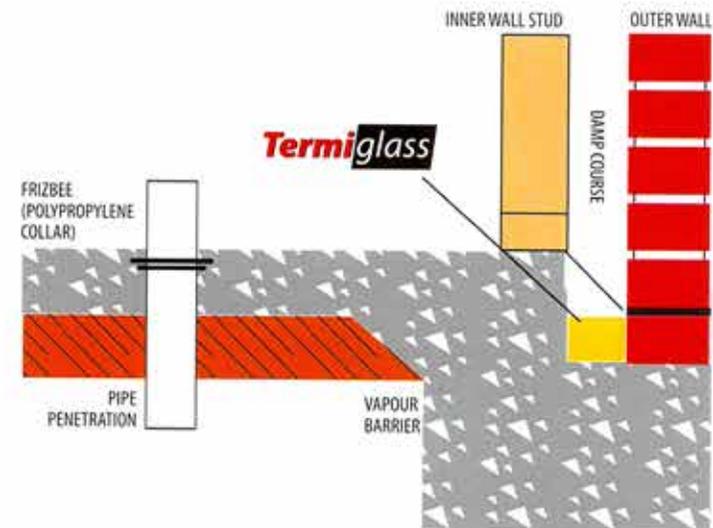

'Termicide Sealant' This flexible silicone sealant is termite resistant and designed for sealing gaps between other termite resistant materials, saw cuts, shrinkage cracks, footing and edge rebates, ant capping, cold joints, key joints, control joints. It has achieved a 630% elongation at rupture result and is a great solution to reduced visual inspection zones.

**'Frizbee Collar'**

Frizbee Collar - Approved by CSIRO, Technical Assessment No.302

'Termiglass' This patented polypropylene collar stops termite entry through slab penetrations. The resistance fitting ensures termite barrier integrity when there is movement of the ground and / or slab.
